University of ibn khaldoun tiaret 10

📅 01/2017 - 06/2020 📍 Tiaret

EXPERIENCE

React native developer

Developatic

📅 02/2023 - Present 📍 Remote

Developatic is a dynamic, small-scale company specializing in the development of custom websites and mobile applications. Focused on delivering user-friendly, high-quality digital solutions, Developatic meets clients' unique needs through end-to-end services—from design to deployment—bringing innovative ideas to life for businesses of all sizes, and these are some of the applications I developed at Developatic.

Kerya: Designed a comprehensive property rental app tailored for the Algerian market, incorporating map integrations, calendar functionalities, real-time chat, and Firebase notifications. Enhanced in-app interactions and usability.

Docminute: Developed and maintained dual applications for patients and doctors, enabling seamless appointment booking and management with real-time updates. Implemented streamlined booking workflows to improve the scheduling experience.

Heyu: Created a mission assignment app that allows clients to delegate tasks to guards with immediate push notifications upon assignment. Improved app reliability, reducing assignment errors.

Darifacile: Built a sales platform that showcases products and specializes in installment-based transactions. Introduced features to enhance the customer purchasing experience.

SUMMARY

React Native Developer with over two years of experience developing mobile applications that deliver seamless user experiences. Skilled in developing applications with real-time capabilities such as chat and notifications, and adept in web technologies like HTML, CSS, and React. Proven track record in creating user-focused solutions using Firebase, Google Maps, Stripe, and other advanced tools, with a commitment to high performance and usability.
